WHY HIRE A PHYSICIST?

Physicists, physical scientists, and engineers with training in first principles, have a unique skill set that can transform a company into a next-generation problem solver. Physicists aim to understand and manipulate the physical phenomena that comprises our world and are not limited by field. They ask fundamental questions, consider novel approaches to longstanding problems, and holistically approach technical challenges with a wide variety of tools. Spanning the full range of bench science to computational modeling to theoretical musings, problem-solving for physicists is as broad as our course of study: mechanical, computational, thermal, biophysical, quantum, electrical, chemical; the list goes on.

Physicists focus on identifying the underlying principles of a system or technology while realizing any inherent assumptions or limitations. They also have the computational skills to create simulations, test models, and analyze data in ways that are frequently the key to finding fundamental solutions. The ability to solve the entire problem, not just a facet, makes physicists a powerful asset to any company.

If you’re looking for creative, innovative, and mindful people, then you want candidates who are seeking their next job opportunity at www.physicstoday.org/jobs.

When we make our next new hire in physics, we consider Physics Today Jobs the most important ‘must use’ service in conducting that search.

—Millsaps College

I hire a lot of people annually and have found over 90% of them on Physics Today. The resume search feature and the outstanding customer service department have been the major reasons I use this site every year. They are the best!

—Astrocamp

Pricing and Packages

Find top talent and highly qualified physical scientists. Post your job online using Physics Today Jobs.

Online jobs are posted IMMEDIATELY and include:
- Posted on Physics Today partner job sites: the AAPT Career Center, APS Physics Job Center, AVS Career Center, and SPS Jobs (entry-level and internships only)
- Access to a searchable resume database
- Posted on Physics Today’s Facebook and Google for Jobs
- Monthly job email blast to nearly 57,000 Physics Today readers
- Rotation on applicable AIP Journal web pages

Pricing for online job postings:
- 30-day — $615
- 60-day — $875
- 90-day — $1,230
- Three 30-day — $1,700
- Five 30-day — $2,705
- Ten 30-day — $5,145
- 60-day Summer Research/Internship posting — Free

Custom job packages available upon request.

Add an upgrade to get prime exposure and prominent visibility:
- Featured Job — $225
  Job rotates on Physics Today Jobs homepage and highlighted in job search results
- Physics Today “The Week in Physics” E-newsletter — $295
  Job appears and is sent to 66,000 Physics Today readers
- Job Tweet — $100
  Job appears on Physics Today’s Twitter channel
